

XM Radio's broadcasting of weather information is absolutely VITAL for truckers throughout this nation, as well as individuals at home. This is a service paid for by the customer, and it truly saves lives with the accurate and current weather conditions. In the free enterprise system which is a part of American business, the NAB has NO right to restrict the programming of XM. I urge you to do everything possible to reject the NAB petition 04-160 with all the force you have. Thank you for your consideration and action on the part of Americans everywhere.
